

VERVE INDUSTRIAL PROTECTION

25 Years of Comprehensive OT Cyber Security Solutions

WHO WE ARE

Verve Industrial is an OT cyber security solution provider, combining the world's leading control system experts with innovative cyber security technology for a comprehensive design, assessment, remediation and monitoring of OT networks.

The Verve Security Center (VSC) provides robust asset inventory, vulnerability assessment, threat detection, and the ability to safely remediate risks in a unified software-based platform.

WHAT WE DO

VERVE INDUSTRIAL solves the most difficult OT protection challenges by integrating design work with the comprehensive OT security platform and support with ongoing management protection services.

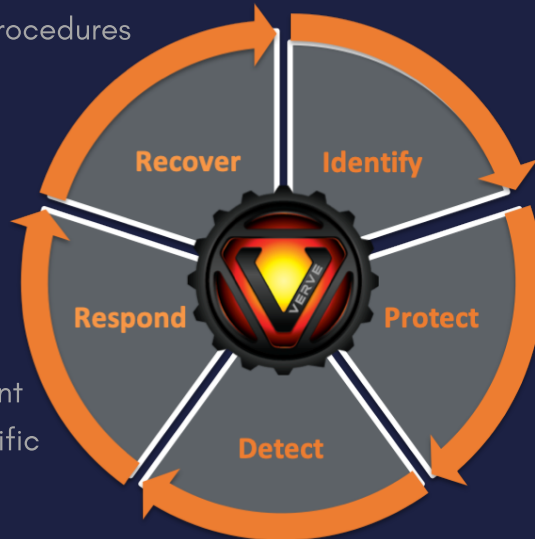

VIP
SERVICES

VSC

- Vulnerability assessment
- Network segmentation
- Secure automation controls design
- Asset discovery and management
- Endpoint protection and response
- Patch management
- Compliance reporting
- Incident response

VSC CAPABILITIES PROVIDE COMPREHENSIVE NIST CSF COVERAGE

- Backup Management
- Recovery Processes and Procedures

- 100% IT-OT Asset Inventory without infrastructure investment
- OT-Safe Vulnerability Assessment
- Configuration Assessment

- Closed-Loop Vulnerability & Patch Management
- Configuration Compliance
- Network Segmentation
- Application Whitelisting/AV
- Privileged Account Management

- Incident Response Toolkit
- Endpoint and Network Management
- Integration Actionability: OT-Specific Remediation

- Configuration Change Management
- Log Management/SIEM
- Host Intrusion Detection
- Integrated Operations Alarm Management

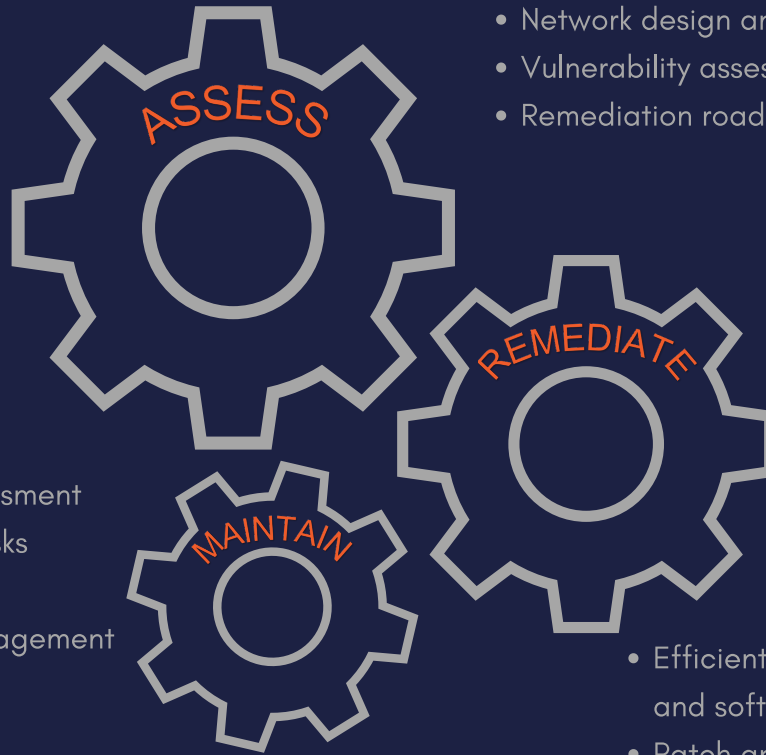

As a customer of 15 years, Verve provides a robust OT risk management program with visibility into our fleet of assets. I am continually amazed by their innovation and exceptional support.

Director, Critical Infrastructure Security | Ameren

HOW WE DO IT

- Real-time vulnerability assessment
- Report on changes / new risks
- Regular recommissioning
- Patch and vulnerability management
- Compliance reporting

- Network design and program assessment
- Vulnerability assessment and prioritization
- Remediation roadmap and program design

- Efficient and safe 100% hardware and software inventory
- Patch and harden key endpoints
- Segment networks
- Configure automation controls

THE VERVE SECURITY CENTER DIFFERENCE

100% SOFTWARE SOLUTION

- No reliance on span/taps to capture traffic
- Deeper visibility into segmented networks
- Faster mean-time-to-deploy at a lower cost

360° ASSET RISK MANAGEMENT

- Improved vulnerability prioritization
- Full visibility into all OT and IT assets, endpoints, configurations, networks, and policies

CLOSED-LOOP PLATFORM

- Faster time to remediation by integration actions and vulnerability assessment into one toolset

THINK GLOBAL, ACT LOCAL

- Scale widely with centralized reporting and analysis
- Reduce cost with locally-controlled remediation

OPEN PLATFORM FOR INTEGRATION

- Leverage prior enterprise IT tool investments
- Safe for all OT environments
