

DATA SHEET

UNLOCKING MAXIMUM VALUE AND IMMEDIATE ROI WITH VERVE

Selecting an OT security platform isn't just about the upfront costs—it's about tangible ROI and sustained value over time. Verve is an all-in-one solution, simplifying tools, producing immediate insights, and showcases your security progress through transparent metrics and robust reporting. Streamline your processes, reduce expenses, and clearly demonstrate progress from the outset. With Verve, you're not just adopting a platform; you're making a value-driven investment that pays off.

Fixed Costs, No Add-Ons

Verve's solution installs on existing assets, avoiding the need to procure infrastructure that can dramatically increase setup costs and time to deploy.

One Platform, Actionable Insights

Instead of purchasing multiple standalone security tools, Verve offers an integrated platform that not only provides insights but also carries out the required actions seamlessly. You save on licensing and reduce the man-hours spent deploying and managing multiple tools.

Start Taking Action

Once Verve profiles your assets, you can immediately identify risks and start remediation tasks. It's not just about finding vulnerabilities; it's about fixing them too.

Automate Security Tasks

Using the "Think Global, Act Local" approach, Verve automates OT-safe 360-degree vulnerability assessments and centralizes risk analysis. This allows for one-time analysis and multiple remediations, reducing manual effort and risk.

NO UNEXPECTED INFRASTRUCTURE COSTS

SAVE 10X^{MORE} PER SITE

An alternative vendor quoted one customer 10x more per site for required infrastructure.

CONSOLIDATE TOOLS, CUT COSTS

REDUCE COSTS BY 30-40%

On average, Verve is 30-40% less expensive than the combined cost of separate, non-connected tools.

TAKE IMMEDIATE STEPS TO IMPROVE SECURITY

CUT time to maturity IN HALF

One client in chemical production achieved their 18-month security goals in just 9 months.

LOWER TCO WITH HANDS-OFF SECURITY

70% less time spent on security management

A global client experienced a 70% reduction in security management time with Verve, leveraging its automated centralized analysis complemented by local, human-guided actions.

Quantify Your Security Progress for Stakeholders

REAL-TIME MONITORING

Verve's dashboard offers instant metrics on asset vulnerabilities, patches, and compliance levels, giving you real-time data that supports quick, informed decisions.

AUDIT-READY REPORTING

Verve's detailed analytics facilitate compliance checks and audits, easily demonstrating your security investment's value to stakeholders and auditors.

Why Choose Verve

No Pre-Required Infrastructure Costs

Integrate Verve seamlessly with your current assets, sidestepping substantial setup fees and achieving instant cost benefits.

Efficient Platform Consolidation

Verve's multi-functional solution offers superior flexibility and cost savings compared to standalone, disconnected tools.

Lowered Total Cost of Ownership

Benefit from Verve's centralized automation, substantially reducing your TCO and enhancing security management efficiency.

Accelerated Security Maturity

Utilize Verve's platform for precise, actionable insights. Swiftly prioritize and remediate, driving your security advancement forward.

What Clients Are Saying

“We did a complete competitive analysis and chose Verve. It has allowed us to double our NIST CSF maturity in 18 months.”

-Global Specialty Chemical Leader

“If we would have bought all of the separate solutions for cyber that each of the above OEM vendors offer, it would be near impossible to manage all of the different tools and implementation strategies.”

-Large Power Generation Client
